

Michael Hillman, Ph.D.

L. Robert and Mary L. Kimball Assistant Professor
Department of Civil and Environmental Engineering
The Pennsylvania State University

Tel: 814-863-0623 Email: mhillman@psu.edu Web: mcharleshillman.com

Education

- 2013 Ph.D.**, Civil Engineering, University of California, Los Angeles
Topic: An Arbitrary Order Variationally Consistent Integration Method for Galerkin Meshfree Methods
Advisor: J. S. Chen
Focus: Computational Mechanics
- 2009 M.S.**, Civil Engineering, University of California, Los Angeles
Focus: Structural and geotechnical earthquake engineering
- 2008 B.S.**, Civil Engineering, California State University, Fullerton

Appointments

- 2016–present Kimball Assistant Professor**, The Pennsylvania State University
Department of Civil and Environmental Engineering
- 2014–2016 Postdoctoral Scholar, Instructor**, University of California, San Diego
Department of Structural Engineering (Advisor: J. S. Chen)
- 2013 Postdoctoral Scholar, Instructor**, University of California, Los Angeles
Department of Civil and Environmental Engineering (Advisor: J. S. Chen)
- 2009–2013 Graduate Student Researcher**, University of California, Los Angeles
Department of Civil and Environmental Engineering
- 2011–2012 Teaching Assistant**, University of California, Los Angeles
Department of Civil and Environmental Engineering

Honors and Awards

1. CAREER Award, The National Science Foundation, 2020
2. L. Robert and Mary L. Kimball Early Career Development Endowed Professorship, The Pennsylvania State University, 2019–2022
3. L. Robert and Mary L. Kimball Early Career Development Endowed Professorship, The Pennsylvania State University, 2016–2019
4. Best Department Poster, Jacobs School of Engineering Research Expo, University of California, San Diego, 2014
5. Fellowship Award, Graduate Division, University of California, Los Angeles, 2013
6. Fellowship Award, Graduate Division, University of California, Los Angeles, 2011
7. Travel Award, US Association for Computational Mechanics, 2010

Research Interests

Development of Advanced Computational Methods

- Accelerated Galerkin meshfree methods for extreme deformation analysis
- Variationally consistent domain integration for arbitrary-order Galerkin accuracy
- Stabilized nodal integration
- Unification of local and non-local meshfree methods
- High-order non-local meshfree methods
- Physics-based shock modeling

Application of Computational Mechanics to Material Failure and Extreme Deformations

- Numerical investigation of damage processes and failure mechanisms of concrete walls and steel panels with varying thickness and impact velocities
- Numerical investigation of shock propagation in reinforced concrete members subjected to blast
- Numerical investigation of tillage and earth-moving operations
- Numerical simulation of three-dimensional deposition printing (concrete, thermoplastics)

Supervised Students and Postdoctoral Scholars

Ph.D. Dissertation Advisor

2020–present	Wang, Y.	"A cohesive reproducing kernel particle method for brittle fracture"
2020–present	Groeneveld, A.	"An immersed variational multiscale reproducing kernel particle method with application to fiber reinforcement in ultra-high performance concrete"
2020–present	Liu, F.	"Hybrid reproducing kernel peridynamic method for extreme event simulation"
2018–2021 (graduated)	Wang, J.	"Stabilized meshfree methods for material failure and composite analysis"
2017–2021 (expected)	Yang, S.	"Reproducing kernel finite volume methods for dynamic brittle fracture"
2016–2020 (graduated)	Lin, K. C.	"A nodally integrated thermo-mechanical meshfree formulation with application to fused deposition modeling"

M.S. Dissertation Advisor

2017–2017 (graduated)	Chen, G. (co-advised)	"A numerical framework of viscoelastic modeling for 3D printable concrete simulation"
-----------------------	-----------------------	---

Postdoctoral Advisor

2018–2020	Madra, A.	"Damage characterization and data-driven meshfree modeling of composite structures"
2017–2018	Zhou, G.	"Immersed meshfree methods for composite solid analysis and fluid-structure interaction"

Undergraduate Research Advisor

2019–2020	Wang, Y.	"Linear system solver selection in meshfree methods"
-----------	----------	--

Supervised Student and Postdoctoral Scholar Awards

Students

1. Yang, S., Harry G. Miller Fellowship In Engineering, The Pennsylvania State University, 2020
2. Yang, S., USACM Thematic Conference on Meshfree and Particle Methods Travel Award, US Association for Computational Mechanics, 2018
3. Lin, K. C., USACM Thematic Conference on Meshfree and Particle Methods Travel Award, US Association for Computational Mechanics, 2018
4. Yang, S., IMECE2018 Travel Award, American Society of Mechanical Engineers, 2018
5. Yang, S., WCCM13 Travel Award, International Association for Computational Mechanics, 2018

Postdoctoral Scholars

1. Madra, M., Second Place, Computation/Modeling, Materials Visualization Competition, The Pennsylvania State University, 2018

Teaching Experience

§New course developed

Penn State

Fall 2020	Graduate	The Finite Element Method (linear static and dynamic analysis)	9 students, one section
Fall 2020	Graduate	Meshfree Methods for Linear and Nonlinear Solid Mechanics [§]	11 students, one section
Spring 2020	Graduate	The Finite Element Method (linear static and dynamic analysis)	7 students, one section
Fall 2019	Undergraduate	Structural Analysis (determinate and indeterminate structures)	153 students, two sections
Spring 2019	Graduate	Meshfree Methods for Linear and Nonlinear Solid Mechanics [§]	4 students, one section
Fall 2018	Undergraduate	Structural Analysis (determinate and indeterminate structures)	155 students, two sections
Spring 2018	Graduate	The Finite Element Method (linear static and dynamic analysis)	9 students, one section
Fall 2017	Undergraduate	Structural Analysis (determinate and indeterminate structures)	60 students, one section
Spring 2017	Graduate	Meshfree Methods for Linear and Nonlinear Solid Mechanics [§]	6 students, one section
Fall 2016	Undergraduate	Structural Analysis (determinate and indeterminate structures)	82 students, one section

UCSD

Summer 2016	Undergraduate	Structural Analysis (determinate and indeterminate structures)	30 students, one section
Summer 2015	Undergraduate	Algorithms and Programming for Structural Engineering	25 students, one section
Summer 2014	Undergraduate	Algorithms and Programming for Structural Engineering	24 students, one section

UCLA

Summer 2013	Undergraduate	Introduction to Computing for Civil Engineers	11 students, one section
--------------------	---------------	---	--------------------------

Research Grants

Hillman has been PI/Co-PI on ten externally funded research projects (PI on nine), with total external funding \$2.1M (Hillman's share: \$1.8M).

- 2021–2023** **STTR phase II: Enhancing thermo-mechanically coupled computational models for high-temperature impact and fracture** (PI: M. Hillman)
Funding Source: Karagozian and Case, Inc.; Prime: Missile Defense Agency
Total awarded: \$358,228 (100% to Hillman)
- 2021–2022** **Numerical modeling of 3D printable concrete** (PI: A. Radlinska, co-PI: M. Hillman)
Funding Source: Penn State
Total awarded: \$60,000 (50% to Hillman)
- 2020–2021** **Enhanced reproducing kernel particle method for strong shock hydrodynamics** (PI: M. Hillman)
Funding Source: Karagozian and Case, Inc.
Total awarded: \$23,090 (100% to Hillman)
- 2020–2025** **CAREER: A hybrid local-nonlocal peridynamics framework to model failure across deformations and strain rates** (PI: M. Hillman)
Funding Source: The National Science Foundation
Total awarded: \$580,845 (100% to Hillman)
- 2019–2020** **STTR phase I: High temperature fracture mechanics** (PI: M. Hillman)
Funding Source: Karagozian and Case, Inc.; Prime: Missile Defense Agency
Total awarded: \$30,000 (100% to Hillman)
- 2019–2021** **Prototype of an enhanced and validated discrete-continuum particle method for microstructural failure simulation in high-performance concrete** (PI: M. Hillman)
Funding Source: U.S. Army Engineer Research and Development Center
Total awarded: \$300,000 (100% to Hillman)
- 2019–2020** **Enhanced reproducing kernel particle method: Variationally consistent naturally stabilized nodal integration** (PI: M. Hillman)
Funding Source: Karagozian and Case, Inc.
Total awarded: \$72,698 (100% to Hillman)
- 2018–2021** **An integrated computational-experimental approach to three-dimensional fracture in polymer-ceramic composites** (PI: M. Hillman, Co-PI: J. Du)
Funding Source: The National Science Foundation
Total awarded: \$545,418 (47% to Hillman)
- 2019** **Benchmarking the reproducing kernel particle method for geotechnical operations** (PI: M. Hillman)
Funding Source: Case New Holland Industrial America LLC
Total awarded: \$59,995 (100% to Hillman)
- 2019** **Evaluation of concrete materials performance in aging structures** (PI: A. Siad, Co-PI: M. Hillman)
Funding Source: The Johns Hopkins University Applied Physics Laboratory LLC
Total awarded: \$34,900 (35% to Hillman)
- 2018–2019** **A discrete continuum particle method for understanding microstructural failure of concrete** (PI: M. Hillman)
Funding Source: U.S. Army Engineer Research and Development Center
Total awarded: \$103,995 (100% to Hillman)

2018–2019 **Development and experimental validation of variational collocation meshfree simulation of fracture of nanoparticle toughened composite materials** (PI: M. Hillman, co-PI: C. Bakis)
Funding Source: Penn State
Total awarded: \$60,000 (96% to Hillman)

Presentations and Posters

Presenter

†Supervised student author

‡Supervised postdoctoral author

Invited Talks

1. Hillman, M. "Meshfree methods for extreme deformations and material damage," Simulia Corp., Providence, Road Island, April 30, 2019.
2. Hillman, M. "Stable high-order meshfree formulations: Recent enhancements and emerging developments," Center for Extreme Events Research Summit, University of California, San Diego, San Diego, California, March 22, 2019.
3. Hillman, M. "Computational frameworks for damage assessment of structures subject to extreme loadings," Department of Mathematics and Statistics, University of New Mexico, Albuquerque, New Mexico, March 4, 2016.
4. Hillman, M. "Computational frameworks for damage assessment of structures subject to extreme loadings," Computer Science Research Institute, Sandia National Laboratories, Albuquerque, New Mexico, February 29, 2016.

Keynote Talks

1. Hillman, M., Chen, J. S., "Stable and robust meshfree integration for extreme event simulations," Engineering Mechanics Institute Conference, San Diego, California, June 4–7, 2017.

Conference Presentations

1. Wang, J.[†], Hillman, M. "A hybrid Lagrangian/semi-Lagrangian meshfree formulation for efficient simulation of extreme deformation problems," 2021 Engineering Mechanics Institute Conference, Virtual, May 25–28, 2021.
2. Hillman, M., Wang, J.[†], "The reproducing kernel finite volume method for elastodynamics," 2021 Engineering Mechanics Institute Conference, Virtual, May 25–28, 2021.
3. Hillman, M., "Instabilities in Petrov-Galerkin methods for elastodynamics," 14th World Congress in Computational Mechanics, Virtual, January 11–15, 2021.
4. Hillman, M., Yang, S.[†], "A reproducing kernel finite volume method for elastodynamics," 14th World Congress in Computational Mechanics, Virtual, January 11–15, 2021.
5. Madra, A.[‡], Hillman, M., "Reduced-order model of concrete microstructure based on X-ray microtomographic imaging," 14th World Congress in Computational Mechanics, Virtual, January 11–15, 2021.
6. Hillman, M., Wang, J.[†], Zhou, G.[‡], Madra, A.[‡], "An immersed nolumetric Nitsche's approach for composites with application to direct numerical simulation of micro-CT Images," International Mechanical Engineering Congress and Exposition 2020, Virtual, November 16–19, 2020.
7. Yang, S.[†], Hillman, M. "A cohesive reproducing kernel finite volume method for brittle fracture simulation," International Mechanical Engineering Congress and Exposition 2020, Virtual, November 16–19, 2020.
8. Wang, J.[†], Hillman, M. "A smoothed Lagrangian naturally stabilized meshfree method for dynamic simulations," International Mechanical Engineering Congress and Exposition 2020, Virtual, November 16–19, 2020.
9. Wang, Y.[†], Hillman, M. "Complexity and accuracy analysis of Galerkin and collocation meshfree

- methods," International Mechanical Engineering Congress and Exposition 2020, Virtual, November 16–19, 2020.
10. Gao, J., Man, R., Wang, Y., Tang, Y., Su, K., Hillman, M., Du, J. "Fracture mechanisms of epoxy-alumina composites," The Minerals, Metals & Materials Society Conference 2020, San Diego, California, February 23–27, 2020.
 11. Hillman, M., Wang, J.[†], Zhou, G.[‡], Madra, A.[‡] "An immersed volumetric Nitsche's approach for composites with application to direct numerical simulation of micro-CT Images," International Mechanical Engineering Congress and Exposition 2019, Salt Lake City, UT, November 11–14, 2019.
 12. Hillman, M., Pasetto, M., Zhou, G.[‡], "Generalized reproducing kernel peridynamics," 15th International Conference on Computational Plasticity, Barcelona, Spain, September 3–5, 2019.

Professional Service

Conferences Committees

1. Member, International Scientific Committee, 16th US National Congress of Computational Mechanics, Virtual, July 25–29, 2021
2. Member, International Scientific Committee, 2021 Engineering Mechanics Institute Conference, Virtual, May 25–28, 2021
3. Member, Technical Committee, Workshop on Meshfree Method and Advances in Computational Mechanics, Pleasanton, California, March 10–12, 2019
4. Member, Scientific Committee, 18th US Congress for Theoretical and Applied Mechanics, Chicago, Illinois, June 4–9, 2018
5. Member, International Scientific Committee, 2018 Engineering Mechanics Institute Conference, Cambridge, Massachusetts, May 29 – June 1, 2018
6. Member, Scientific Organizing Committee, Meshfree and Particle Methods: Applications and Theory, Santa Fe, New Mexico, September 10–12, 2018
7. Member, Scientific Committee, Computations Subcommittee, 18th U.S. National Congress for Theoretical and Applied Mechanics, Chicago, Illinois, June 4–9, 2018
8. Member, International Scientific Committee, 2017 Engineering Mechanics Institute Conference, La Jolla, California, June 4–7, 2017

9. Member, Scientific Committee, USACM Conference on Isogeometric Analysis and Meshfree Methods, La Jolla, California, October 10–12, 2016

Organizing Minisymposia

1. Invited Session Organizer, "Extreme Events," Meshfree and Novel Finite Elements with Applications, Berkeley, California, September 25–27, 2022
2. Session Organizer, "Simulation-based Disaster Prediction and Mitigation," 15th World Congress in Computational Mechanics, Yokohama, Japan, July 31–August 5, 2022
3. Invited Topic Organizer, "Recent Advances and Applications in Meshfree and Particle Methods," 2021 International Mechanical Engineering Congress and Exposition, Virtual, November 1–5, 2021
4. Invited Session Organizer, "Meshfree, Peridynamics, and Particle Methods: Contemporary Methods and Applications," 16th International Conference on Computational Plasticity, Barcelona, Spain, September 7–10, 2021
5. Session Organizer, "Recent Advances and Applications in Meshfree and Particle Methods," 16th US National Congress of Computational Mechanics, Virtual, July 25–29, 2021
6. Session Organizer, "Meshfree, Peridynamic, and Particle Methods: Contemporary Methods and Applications," 2021 Engineering Mechanics Institute Conference, Virtual, May 25–28, 2021
7. Session Organizer, "Advances and Application of Meshfree and Particle Methods," 14th World Congress in Computational Mechanics, Virtual, January 11–15, 2021
8. Session Organizer, "Computational Modeling of Natural and Manmade Disasters," 14th World Congress in Computational Mechanics, Virtual, January 11–15, 2021
9. Invited Topic Organizer, "Recent Advances and Applications in Meshfree and Particle Methods," 2020 International Mechanical Engineering Congress and Exposition, Virtual, November 16–19, 2020
10. Topic Organizer, "Recent Advances and Applications in Meshfree and Particle Methods," 2019 International Mechanical Engineering Congress and Exposition, Salt Lake City, Utah, November 11–14, 2019
11. Session Organizer, "Meshfree, Particle, and Peridynamic Methods," 15th International Conference on Computational Plasticity, Barcelona, Spain, September 3–5, 2019
12. Session Organizer, "Advances and Applications in Meshfree and Particle Methods," 15th US National Congress of Computational Mechanics, Austin, Texas, July 28–August 1, 2019
13. Session Organizer, "Meshfree, Peridynamics, and Particle Methods: Contemporary Methods and Applications," 2019 Engineering Mechanics Institute Conference, Pasadena, California, June 18–21, 2019
14. Session Organizer, "Robust, Adaptive, High-Resolution Methods For Unsteady Flows," 20th International Conference on Fluid Flow Problems, Chicago, Illinois, March 31–April 3, 2019
15. Session Organizer, "Recent Advances and Applications in Meshfree and Particle Methods," 2018 International Mechanical Engineering Congress and Exposition, Pittsburgh, Pennsylvania, November 9–15, 2018
16. Session Organizer, "New Trends in Extreme Events Modeling," 13th World Congress in Computational Mechanics, New York, New York, July 22–27, 2018
17. Invited Focus Area Organizer, "Penetration and Perforation," Meshfree and Particle Methods: Applications and Theory, Santa Fe, New Mexico, September 10–12, 2018
18. Session Organizer, "Meshfree, Peridynamics, and Particle Methods: Contemporary Methods and Applications," 2018 Engineering Mechanics Institute Conference, Cambridge, Massachusetts, May 29–June 1, 2018
19. Session Organizer, "Simulation, Prediction, and Mitigation of Extreme Events," 2018 Engineering Mechanics Institute Conference, Cambridge, Massachusetts, May 29–June 1, 2018

20. Session Organizer, "Meshfree and Particle Methods: New Developments and Applications," 14th US National Congress of Computational Mechanics, Montréal, Québec, Canada, July 17–20, 2017
21. Session Organizer, "Extreme Event Modeling," 2017 Engineering Mechanics Institute Conference, La Jolla, California, June 4–7, 2017
22. Invited Session Organizer, "Quadrature and Stability Issues in IGA and Meshfree Methods," US-ACM Conference on Isogeometric Analysis and Meshfree Methods, La Jolla, California, October 10–12, 2016

Professional Committees

1. Elected Member, US Association for Computational Mechanics Technical Thrust Area on Novel Methods in Computational Engineering & Sciences (2019–present)
2. Elected Member, Engineering Mechanics Institute Computational Mechanics Technical Committee (2016–present)

Editorial Service

1. Associate Editor, Computer Modeling in Engineering and Sciences (2020–present)
2. Editorial Board, Science Progress (2019–present)
3. Guest Editor, Computational Particle Mechanics, Thematic Issue, Meshfree and Particle Methods for Modeling Extreme Loadings (2019)
4. Editorial Board, Frontiers in Built Environment, Computational Methods in Structural Engineering Specialty Section (2018–present)

Peer Review of Manuscripts

1. Reviewer, Computational Mechanics (10)
2. Reviewer, Computer Methods in Applied Mechanics and Engineering (5)
3. Reviewer, International Journal for Numerical Methods in Engineering (5)
4. Reviewer, Journal of Engineering Mechanics (3)
5. Reviewer, Finite Elements in Analysis and Design (1)
6. Reviewer, Computers and Geotechnics (1)

Peer Review of Grant Proposals

1. Reviewer, The National Science Foundation (1 panel)
2. Reviewer, The Research Grants Council of Hong Kong (2 proposals)

Memberships

1. American Society of Civil Engineers, Central Pennsylvania (2016–present)
2. Engineering Mechanics Institute (2016–present)
3. International Association of Computational Mechanics (2014–present)
4. US Association of Computational Mechanics (2013–present)
5. American Society of Civil Engineers (2008–present)

University Service

Department

1. Member, Graduate Program Committee (2020–present)
2. Member, Civil and Environmental Engineering Seminar Series Committee (2019–2020)
3. Chair, Research Innovation Committee (2019–2020)
4. Chair, Civil and Environmental Engineering Seminar Series Committee (2017–2019)
5. Member, Faculty Search Committee (2016, 2017, 2019)
6. Chair, PhD Qualifying Exam Committee (2017–present)
7. Member, PhD Candidacy Exam Committee (2016)

College

1. Chair, College of Engineering Research Computing Committee (2018–2020)
2. Member, College of Engineering Research Computing Committee (2017–2018)

University

1. Member, Institute for Computational and Data Sciences 2020 Symposium Planning Committee (2019–2020)
2. Member, Research Computing and Cyberinfrastructure Advisory Council (2018–present)
3. Member, Institute for Computational and Data Sciences Coordinating Committee (2017–present)

Memberships

1. Associate Member, Institute for CyberScience (2017–present)
2. Member, Fluid Dynamics Research Consortium (2016–present)
